

The advertisement features a large circular cutout on a blue background, showing a white Anker cash drawer. The drawer is open, revealing several white cassettes and a slide-out tray with multiple compartments. The Anker logo is visible on the front of the drawer. The overall design is clean and professional, emphasizing the product's functionality and durability.

# **Anker Cash Drawers**

A versatile and durable range of cassettes  
and slide-out drawers

**[anker-systems.com](http://anker-systems.com)**

The Anker range of Cash Drawers delivers unrivalled functionality at the Point of Sale. They are designed to offer the ease of use and durability demanded in busy retail environments, and are proven in practice in thousands of checkouts around the globe.

Anker drawers have been developed around a core of class-leading features:

- Unrivalled ease of use and ergonomic design to make life easier for operatives in busy environments.
- The highest standards of security.
- Fast release and connection.
- Strong and robust construction for a very long product life.
- Contemporary and good-looking design that blends into a modern retail environment.

## Cassette Drawers

There are two drawers in the cassette range – the Standard and the Euro Cassette. They are designed on the same principles but they differ in size, base and compartment configuration.

Anker cassette drawers offer the following user benefits:

- The cassettes fit all standard cash terminals for maximum versatility.
- The cassette opens upwards which allows the operative to sit closer to the cash terminal and reach goods more easily.
- The open lid offers good shielding for the cassette contents.

- Because the locked cassette slides onto a permanently housed base plate it is easy to remove and connect for maximum security. This facility, only available on Anker cassettes, means there is no need for a lid for the cassette contents. The removal of the complete cassette also clearly shows no cash content in checkout positions that are visible at night, reducing the risk of break-ins.
- The size, lightness and compact nature of the cassette make it very easy to transport. To remove the cassette, the operative simply presses a button.
- The cassette is manufactured from very strong and durable plastic which ensures a very long life. The plastic chosen by Anker is environmentally friendly and easily recyclable.
- A wide media slot provides an easily accessible and secure storage facility for vouchers at the bottom of the cassette without needing to open the cassette (Euro cassette drawer only).
- The cassette has a key lock plus the option of an additional front lock for extra security (Euro cassette drawer only).
- The cassette is always locked for security and can only be opened by the cash terminal or using the key.

and Base*

## Euro Cassette Drawer

The Euro Cassette is bigger in overall size than the standard version and has a smaller base configuration. As well as a different compartment layout it offers an additional lock for security.

Includes nine coin compartments, six note compartments, a cheque and credit card voucher compartment and storage for vouchers. This configuration is flexible enough to cope with all currency types.

### Optional additional features include:

- Up to 30 standard lock variations or 2000 if the additional front lock is fitted.
- Note holder.
- Adaptability for OEM requirements.

### Dimensions

Width 482mm, Depth 175mm, Height 100mm

### Weight

Cash cassette approx. 1.8Kg

Cassette base approx. 0.4Kg

### Colour

Light grey, Dark grey

Length of connecting cable – up to 5 metres

### Universal Cash Drawer

The new Universal slide-out drawer builds on the success of the Standard Drawer to offer even more benefits at the Point of Sale. The drawer has been completely redesigned in gas reinforced plastic to make it stronger and lighter, with a greater capacity in a smaller unit. The new drawer has a host of other important benefits:

- A new extended runner movement facilitates the complete removal of the folding coin and note compartment. This enables the operative to close and lock the compartment as a secure box for transport. This additional security feature minimises the time when cash is on display and makes transportation easier.
- High quality ball bearing slides combined with the extended runner movement deliver a very long product life in busy retail and hospitality environments.
- The drawer is opened via connection to keyboard, printer or PC. Two high quality front locks are available. The first gives you 30 possible key combinations, the second option up to 2000 possible key combinations for additional security.

- A wide media slot provides an easy to use and secure compartment for storing cheques, vouchers and high denomination bank notes. The contents remain at the bottom of the folded coin and note compartment when it is transported.
- The Universal Cash Drawer fits all PoS systems. Adaptability to different models is made easy with our new universal cable connector, housed in an interchangeable release module at the rear of the drawer. Our range of modules fit all systems and we simply select and fit the one that is appropriate to you. That also means that if you change systems you save money because you only need to fit a new module – not replace the whole drawer.
- The cash insert is flexible in design. The standard European configuration has 5 note and 8 coin compartments, and this can be changed by replacing 2 coin with 1 note compartment if desired.

### Dimensions

Width 385mm, Depth 435mm, Height 95mm

### Weight

4.75Kg

### Colour

Light grey,  
Dark grey
